

SIDDHI WAGHMARE

Senior Python Developer | AI/ML Engineer | Data Engineer
waghmaresiddhi1607@gmail.com | +91 9373342128 | github.com/wsiddhi | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Python Developer and AI Engineer with a strong track record of building production-grade, scalable Python applications across financial analytics, NLP, and enterprise platforms. Expert in Python system architecture, Django, FastAPI, REST API design, and ETL pipelines. Proficient in NumPy, Pandas, OpenCV, PostgreSQL, Redis, and data structures and algorithms. Peer-reviewed research published at IEEE ESCI 2026 and IJSRA. Immediate joiner — available for US/UK overlap hours.

TECHNICAL SKILLS

Core Python	Advanced Python · System Architecture · DSA · OOP · Performance Optimization · Scripting & Automation
Data & ML	NumPy · Pandas · OpenCV · Machine Learning · NLP · HuggingFace Transformers · spaCy · VADER · FinBERT
Backend	Django · Django REST Framework · FastAPI · Flask · REST APIs · JWT Auth · WebSockets
Databases	PostgreSQL · MySQL · MongoDB · Redis (cache & pub/sub) · Firebase
Messaging	Redis pub/sub · RabbitMQ · Celery · Async task queuing
Integrations	Google APIs · Fyers API · AWS Cloud · Git · Docker
Edge AI	NVIDIA Jetson architecture · Edge AI deployment · Computer Vision pipelines

EXPERIENCE

Freelance Python & AI Developer · Self-Employed 2024 – Present

- Architected and delivered scalable Django/FastAPI backends with Redis caching, PostgreSQL, JWT authentication, and role-based access control for finance and enterprise clients.
- Implemented Redis pub/sub patterns and async task queuing via Celery across multiple production Python projects.
- Built RESTful APIs, automated data pipelines, analytics dashboards, and workflow automation systems processing live third-party API feeds.

KEY PROJECTS

FINSPIRE — Real-Time Financial News Intelligence · IEEE ESCI 2026

- Python pipeline ingesting real-time RSS & API feeds with dual-engine NLP (VADER + FinBERT); NumPy/Pandas signal aggregation; Django + PostgreSQL backend achieving sub-second query response.

Trade Executor — Automated Trading Dashboard

- Python-based live order execution system integrating Fyers API; Redis caching for live price data, PostgreSQL for high-frequency audit logging, built on Django REST Framework.

MailGlance — AI Email Summarization · IJSRA 2025

- Python NLP pipeline using HuggingFace Transformers + FastAPI; semantic ranking via NumPy embedding arithmetic; inference optimized with model quantization and batch processing.

Smart Recipe Recommender

- Python-based recipe recommendation engine using NLP and collaborative filtering; FastAPI backend with PostgreSQL, Redis caching for fast lookups, and ML-driven personalized suggestions based on ingredients and user preferences.

EDUCATION | CERTIFICATIONS | ACHIEVEMENTS

B.Tech — Artificial Intelligence & Analytics

CGPA: 8.10 / 10

MIT School of Computing, Pune | 2022 – 2026

- IT Specialist – Data Analytics (Certiport) · AWS Cloud Foundations · Predictive Analytics & ML (IBM)
- IEEE ESCI 2026 Research Author · IJSRA Published Author · Smart India Hackathon 2024 · 8+ production Python & AI projects
